

Eliminate Password Risk & Protect Client Confidentiality

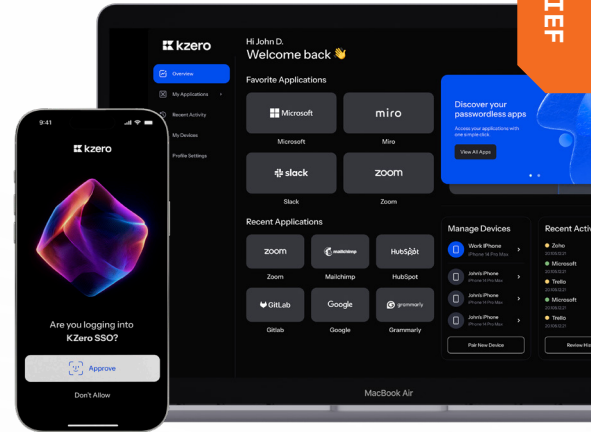

Modern authentication built for law firms.
Reduce credential risk, phishing exposure,
and liability without slowing attorneys down.

The risks & reality law firms face

Law firms are prime targets for cyberattacks
because they hold:

- Privileged client communications
- Case strategy and litigation files
- Financial settlement data
- Personally identifiable information

Today, most law firm breaches begin with stolen
credentials, not sophisticated hacking.

80%+

of breaches are caused
by stolen credentials

700%

2025 increase in phishing
due to AI-driven attacks

36%

of law firms reported a
cybersecurity breach
in the past year

56%

of breached law firms
lost sensitive client data

Meet KZero Passwordless

Login Made Simple

Replace passwords with biometric
sign-in. Attorneys authenticate using
Face ID, fingerprint, or their device
— no passwords to remember or type.

Phishing-Resistant Access

Stop credential theft before it starts.
Device-bound authentication prevents phishing,
even if users click fake login pages.

One Secure Identity

Access all firm applications safely.
Sign in once with biometrics and securely
access email, documents, and practice systems.

Protect Legacy Legal Apps

Secure apps that still require passwords.
For apps that don't support SSO or passkeys, KZero
stores credentials in an encrypted biometric vault.

Why Law Firms Are Moving Beyond Passwords

■ Secure Client Confidentiality

Reduced risk of unauthorized access and stronger protection for privileged communications.

■ Meet Compliance and Cyber Insurance Requirements

Supports the security controls insurers and regulators expect.

■ Ensure Operational Continuity

Fewer lockouts and password resets and less downtime caused by account compromise.

■ Improves Attorney Productivity

Less time troubleshooting access issues means more time on high-value legal work.

How Passwordless Access Works in Your Firm

1 Attorney authenticates with biometrics on their device

Replace passwords with a quick glance or fingerprint scan.

2 Access is bound to trusted devices

Logins cannot be replayed, shared, or phished.

3 KZero securely grants access to applications

Email, documents, practice systems, and remote access are handled automatically.

**No passwords are typed.
No codes are intercepted.
No secrets are exposed.**

Security That Doesn't Slow Attorneys Down

- No additional MFA prompts
- No password resets
- Fast login on office and remote devices
- Works across laptops, desktops, and mobile

Security improves without adding friction to legal work.

Delivered Through Your Trusted IT Provider

No change in who you call for reliable support.
